Instructions to Contributors

1. Manuscripts should be sent to the Editor:

Kenneth J. Zucker, Ph.D.
Child and Adolescent Gender Identity Clinic
Child Psychiatry Program
Centre for Addiction and Mental Health—Clarke Division
250 College Street
Toronto, Ontario M5T 1R8
Canada
e-mail: Ken.Zucker@camh.net

For book reviews, two copies of the book should be sent to the Editor at the address above.

2. Submission is a representation that the manuscript has not been published previously and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Kluwer Academic/Plenum Publishers will be required before the manuscript can be accepted for publication. The Editor will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.
3. Type double-spaced on one side of U.S. (8 1/2 × 11 inch) or A4 white paper, using 1 inch margins on all sides, and submit the original and three copies (including copies of all illustrations and tables). In order to facilitate masked review, leave all identifying information off the manuscript.
4. A title page is to be provided and should include the title of the article, author's name (including highest degree received), author's institutional affiliation, and suggested running head (no more than 80 characters, including spaces). Academic affiliations of all authors should be included. The affiliation should include the department, institution, city, and state (or nation) and should be typed as a footnote to the author's name. For office purposes, the title page should include the complete author designated to review proofs.
5. An abstract, preferably no longer than 250 words, is to be provided as the second page.
6. A list of 4-5 key words is to be provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes.
7. Illustrations (photographs, drawings, diagrams, and charts) are to be numbered in one consecutive series of Arabic numerals. Photographs should be large, glossy prints, showing high contrast. Drawings may be prepared with india ink or may be computer generated if dark, sharp and clear (no dot matrix). Either the original drawings or good-quality photographic prints are acceptable. Identify figures on the back with author's name and number of the illustration. Each figure should have an accompanying caption. The list of captions for illustrations should be typed on a separate sheet of paper. Electronic artwork submitted on disk should be in TIFF or EPS format (1200 dpi for line and 300 dpi for half-tones and gray-scale art). Color art should be in the CMYK color space. Artwork should be on a separate disk from the text, and hard copy *must* accompany the disk.
8. Tables should be numbered consecutively using Roman numerals and referred to by number in the text. Each table should be typed on a separate sheet of paper and should have a descriptive title. Center the title above the table, and type explanatory footnotes (indicated by superscript lowercase letters) below the table.
9. List references alphabetically at the end of the paper and refer to them in the text by name and year in parentheses. References should include (in this order): last names and initials of *all* authors, year published, title of article, name of publication, volume number, and inclusive pages. The style and punctuation of the references should conform to strict APA style—illustrated by the following examples:

Journal Article
Meston, C. M., & Frohlich, P. F. (2000). The neurobiology of sexual function. *Archives of General Psychiatry*, 57, 1012-1030.

Book
Dixson, A. F. (1998). *Primate sexuality: Comparative studies of the proximians, monkeys, apes, and human beings*. New York: Oxford University Press.

Chapter in a Book
Bem, D. (2000). The exotic-becomes-erotic theory of sexual orientation. In J. Bancroft (Ed.), *The role of theory in sex research* (pp. 67-81). Bloomington, IN: Indiana University Press.
10. Footnotes should be avoided. When their use is absolutely necessary, footnotes should be numbered consecutively using Arabic numerals and should be typed at the bottom of the page to which they refer. Place a line above the footnote, so that it is set off from the text. Use the appropriate superscript numeral for citation in the text.
11. The 2001 *Publication Manual of the American Psychological Association* (Fifth Edition) should be used as the style guide for the preparation of manuscripts, particularly with respect to such matters as the citing of references and the use of abbreviation, numbers, and symbols. Manuscripts departing significantly from the Fifth Edition style will not be reviewed until a corrected manuscript has been received.
12. After a manuscript has been accepted for publication and after all revisions have been incorporated, manuscripts should be submitted to the Editor's Office as hard copy accompanied by electronic files on disk. Label the disk with identifying information—software, journal name, and first author's last name. **The disk must be the one from which the accompanying manuscript (finalized version) was printed out.** The Editor's Office cannot accept a disk without its accompanying, matching hard-copy manuscript.
13. **The journal makes no page charges.** Reprints are available to authors, and order forms with the current price schedule are sent with proofs.
